CONTINUING EDUCATION PROGRAM
Orthotics Courses

Looking for collaborative-based CE?

Hanger Clinic offers multiple one hour continuing education programs in the areas of orthotics and prosthetics. Each course is designed using an interdisciplinary approach, allowing your health care team the opportunity to collaborate and share learning experiences.

Participants in our orthotics courses learn about a wide range of diagnoses, treatments and care pathways surrounding clinical conditions such as scoliosis, congenital muscular torticollis (CMT), and cranial asymmetries. A focus on the importance of establishing an interdisciplinary health care team is stressed as we strive to provide optimal care for the orthotic patient.

Who should attend:

PT/PTA, OT/OTA, Case Managers, and Nurses

Courses

• Ankle Foot Orthoses: Patient Evaluation and Design Criteria
• Congenital Muscular Torticollis and the Orthotic Management of Cranial Asymmetry (120 Min)
• Cranial Asymmetries: More than Circumference Measurements (90 Min)
• Fracture Orthoses
• Orthotic Applications in Sports Medicine
• Overview of Spinal Orthoses
• Orthotic and Prosthetic Introduction for Case Managers
• Primer on the Orthotic Trauma Patient
• Scoliosis Orthotic Treatment Modalities: Adolescent Idiopathic Scoliosis (60 min or 90 min session)
• Stance Control Orthoses

*Disclaimer: Approval of Hanger Clinic courses and the number of hours awarded varies state to state. Please check with your Hanger Clinic representative for course approval information specific to your state.

CONTINUING EDUCATION PROGRAM
Prosthetic Courses

Looking for collaborative-based CE?
Hanger Clinic offers multiple one-hour continuing education programs in the areas of orthotics and prosthetics. Each course is designed using an interdisciplinary approach, allowing your health care team the opportunity to collaborate and share learning experiences.

Our prosthetics courses focus on understanding the multiple resources, clinical conditions, and rehabilitation treatment programs associated with upper and lower extremity prosthetic patients. Come learn how the health care team can work together to help individuals with upper and lower limb loss return to their functional activities that are most important to them.

Who should attend:
PT/PTA, OT/OTA, Case Managers, and Nurses

Courses
- Advanced Concepts in Prosthetic Feet
- Clinical Decision Making for Upper Limb Prosthetics
- Improving Transfemoral Amputee Gait: A Step in the Right Direction
- Improving Transtibial Amputee Gait: A Step in the Right Direction
- Introduction to Prosthetic Feet: Finding the Foot that Fits
- Introduction to Prosthetic Knees
- Lower Limb Prostheses, Design to Ambulation
- Microprocessor Knee Design
- Overview of Lower Limb Prostheses
- Overview of Upper Limb Prostheses
- Orthotic and Prosthetic Introduction for Case Managers
- Postoperative Care Following Traumatic Amputation
- Postoperative Prosthetic Modalities for Lower Limb Amputations
- Prosthetic Interventions for the Individual with Partial Hand Loss
